

31AV9Q3I643

This exploded perspective view shows the seat assembly components. At the top, a rectangular seat backrest (36) is shown with a hinge mechanism (36A) and a support arm (36B). Below it is a large, contoured seat cushion (39) with a central channel (43) and side supports (41). The seat is mounted on a base (42) which includes a hinge (38) and a support arm (40). The base is connected to a frame (2) via a hinge (7) and a support arm (14). The frame is further connected to a base plate (16) via a hinge (18) and a support arm (25). The base plate is connected to a rear support (28) via a hinge (9) and a support arm (32). The rear support is connected to a rear frame (33) via a hinge (35) and a support arm (34). The rear frame is connected to a rear base (36) via a hinge (38) and a support arm (40).
